MUMMADI ADARSH

(+91) 7416463004 | adarshchary.05@gmail.com | GitHub | LinkedIn | Portfolio | LeetCode | Hyderabad, India

Professional Summary

- Computer Science undergraduate with strong foundations in **Java, Data Structures and Algorithms, and Software Engineering**, with hands-on experience building full-stack and **microservice-based applications** using **React, Node.js, Express, FastAPI, REST APIs, and MySQL**. Experienced in integrating AI services into web applications and solving complex software engineering problems.

Skills & Technologies

Programming Languages: Java, JavaScript, Python (Basic), C
Backend: Node.js, Express.js, REST APIs, JWT Authentication, FastAPI (Basic)
Frontend: React.js, Redux, Zustand, HTML5, CSS3, Tailwind CSS
Databases: MySQL, MongoDB
Tools and Concepts: Git, GitHub, WebSockets, Socket.io, Microservices, Generative AI, Prompt Engineering.

Projects

PrepWise-AI — Personalized Interview Preparation Platform | GitHub — Aug 2026 – Sep 2026

- Built a full-stack interview preparation platform using **React, Node.js, Express, MongoDB, and a Python FastAPI microservice.**
- Integrated the Gemini API for resume/JD analysis, skill-gap identification, and personalized roadmap generation.
- Implemented AI-generated technical assessments with topic-wise scoring and weak-area detection.
- Developed an adaptive roadmap workflow that generates revisions from assessment performance and allows candidate review before applying.
- Created secure authentication, protected routes, session management, and a responsive dashboard interface.

Hellow — Real-Time Chat Application | GitHub | Live Demo — May 2025 – June 2025

- Designed and built a real-time messaging system using **React, Node.js, Express, and Socket.io** to support concurrent users.
- Implemented secure authentication and authorization using **JWT and OAuth 2.0**.
- Improved application maintainability through global state management with **Zustand**.
- Optimized backend performance using server-side pagination and implemented message management and active-user features.

Workout-Tracker — Full Stack Application | GitHub — Feb 2025

- Developed a full-stack workout tracking application using React, Node.js, Express, and MySQL with complete CRUD functionality.
- Designed relational database schemas and SQL queries for efficient storage and retrieval of workout records.
- Built data visualizations using Recharts to analyze workout progress and performance trends.
- Designed and implemented RESTful APIs for managing exercises, workout sessions, and user records.

Education

CMR Technical Campus — Hyderabad, Telangana
B-Tech in Computer Science and Engineering; ***CGPA: 9.10*** — *2023 – 2027*

Teja's Jr. College — Telangana
XII – MPC; Percentage: 73.6% — *2021 – 2023*

Achievements

- Solved **650+** Data Structures and Algorithms problems across LeetCode, Codeforces, GeeksforGeeks, and CodeChef.
- Secured **Top 10** ranks in multiple Smart Interviews competitive programming contests at the college level, earning **T-shirts and badges** across two phases.
- Completed DSA training at Smart Interviews. Certificate

Coursework

- Data Structures and Algorithms, Object Oriented Programming, Database Management Systems.
